

### Supplementary File 1.

**Connexin mRNA expression in healthy lung tissue (blue) and corresponding lung tumour subtypes LUAD and LUSC (red).** The figure corresponds to Table 1 (and are grouped into (a) increased, (b) decreased or (c) mixed changes in connexin expression in LUSC and LUAD compared to healthy tissue).

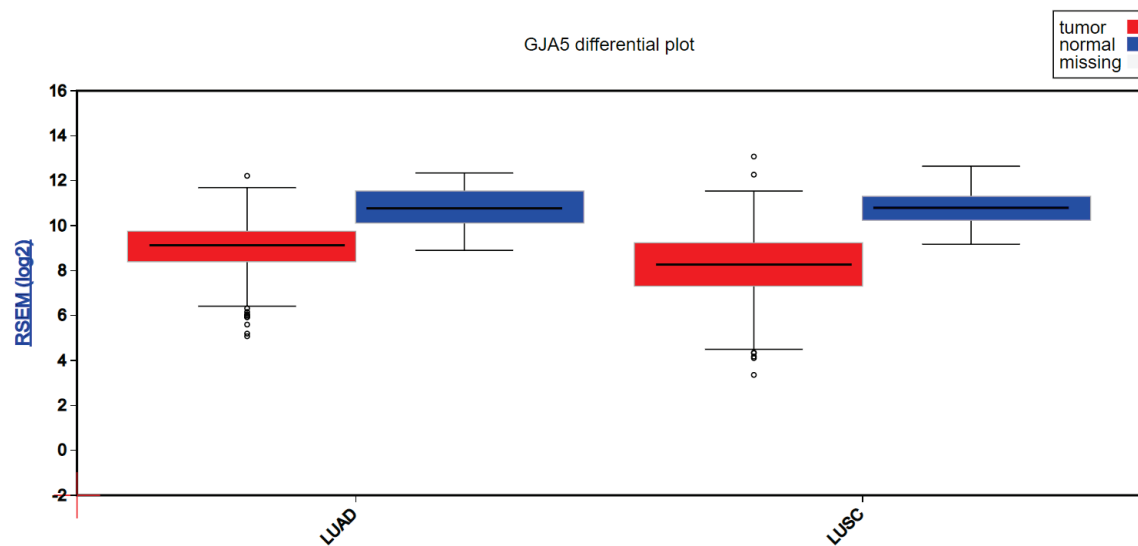

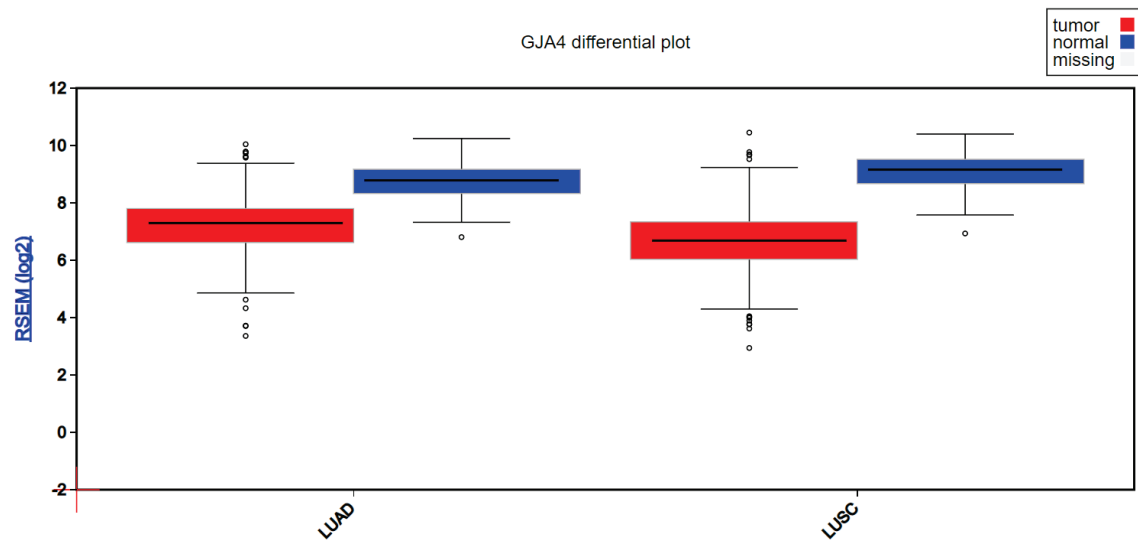

#### A) Increased expression in LUAD and LUSC tumours:

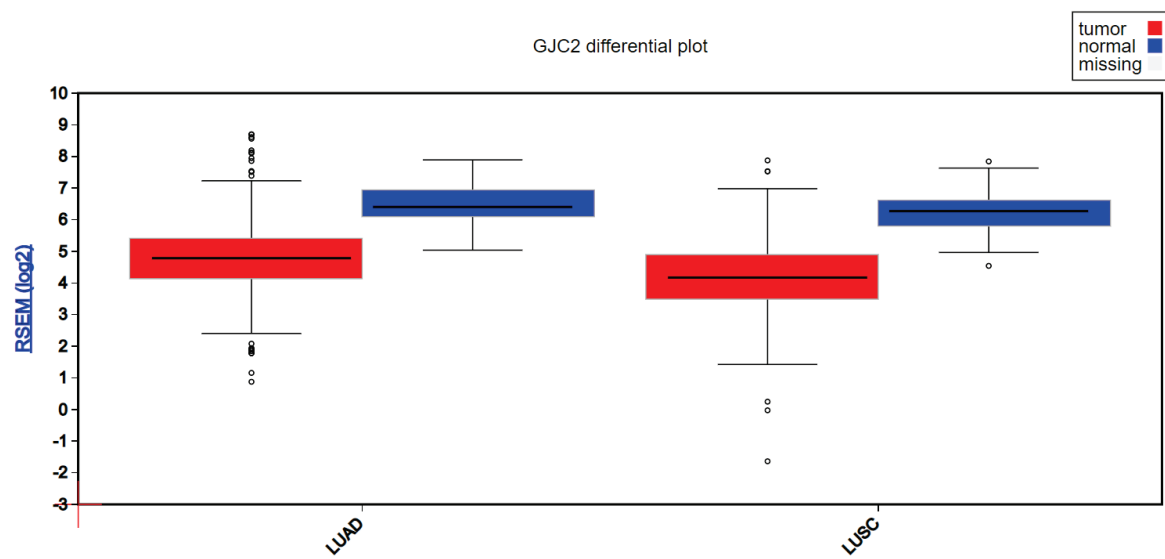

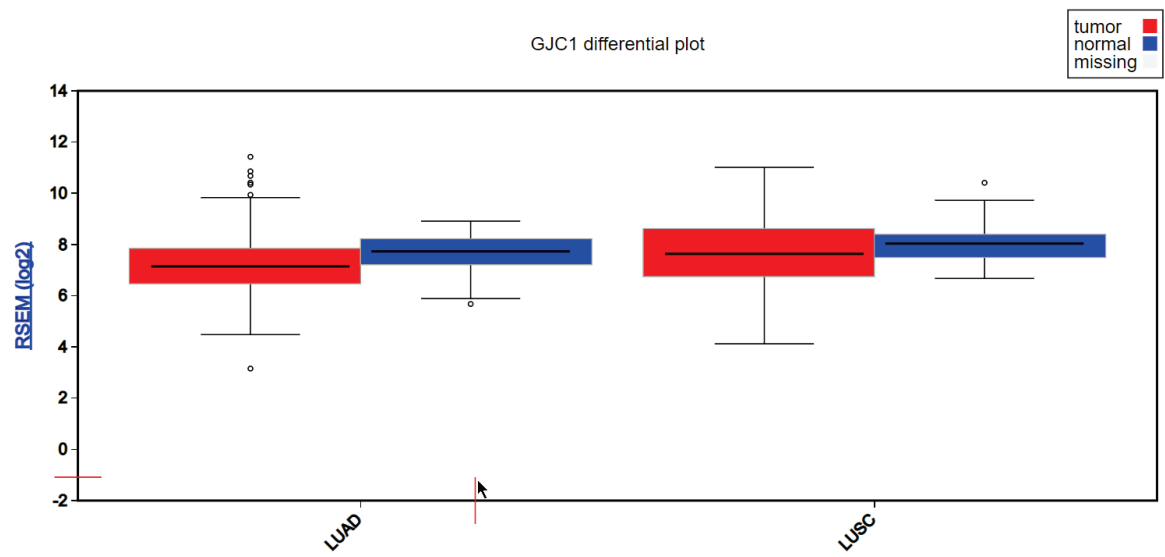

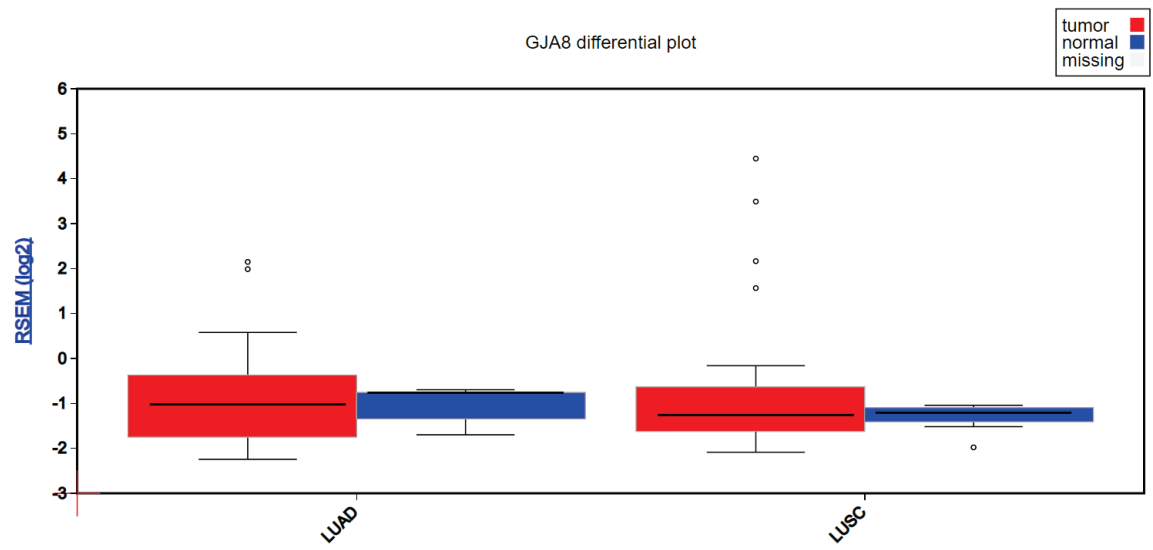

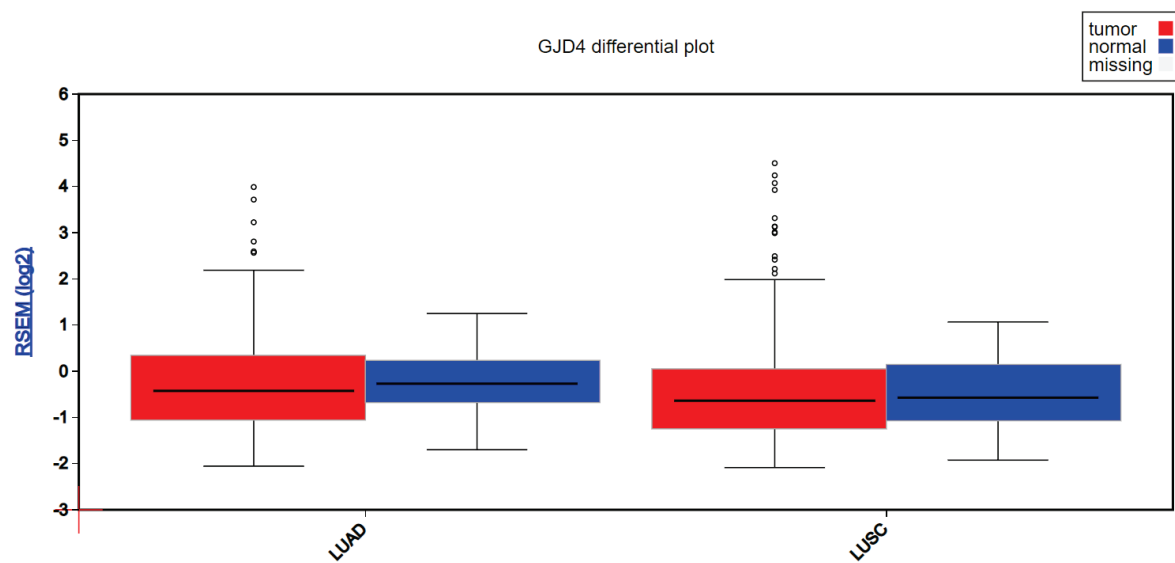

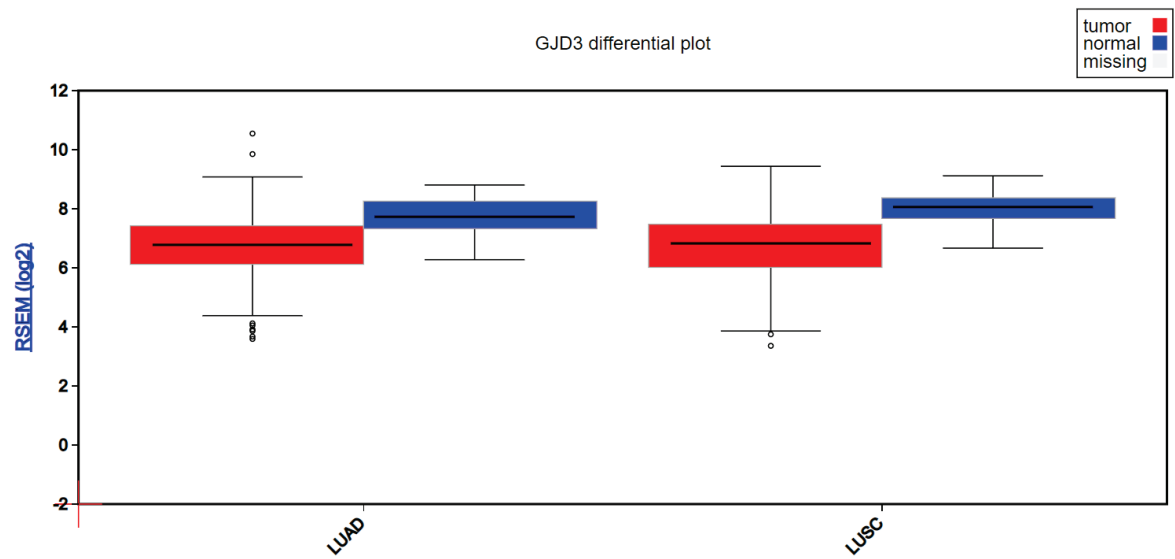

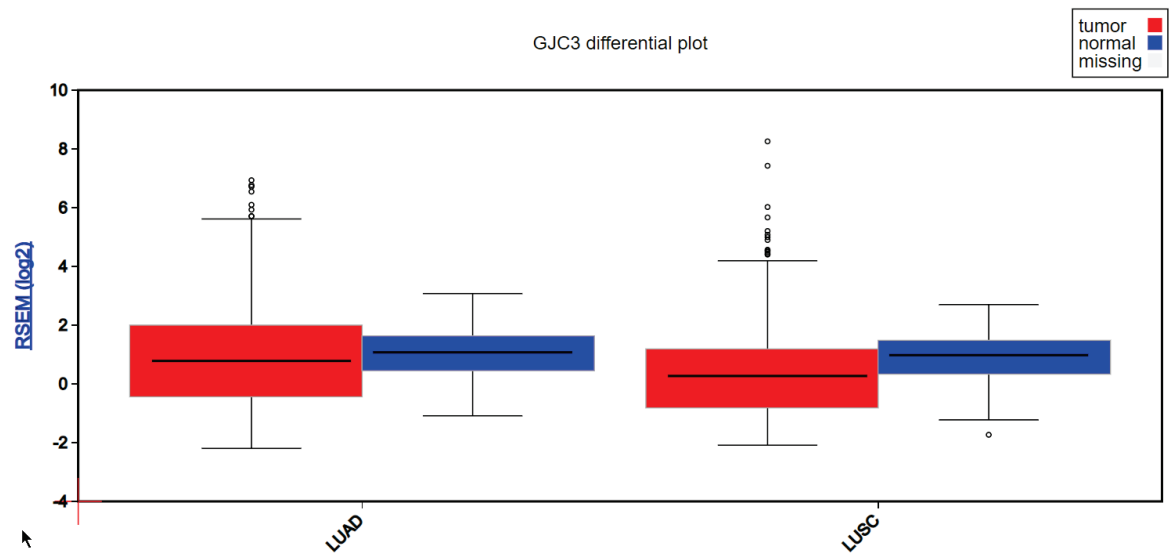

**B) Decreased expression in both LUAD and LUSC tumours:**

**C) Mixed, increased and decreased expression in LUAD versus LUSC tumours:**
