

In the absence of ligand, EGF and IGF regulate ER mediated gene transcription

WG 10000 ng/ml

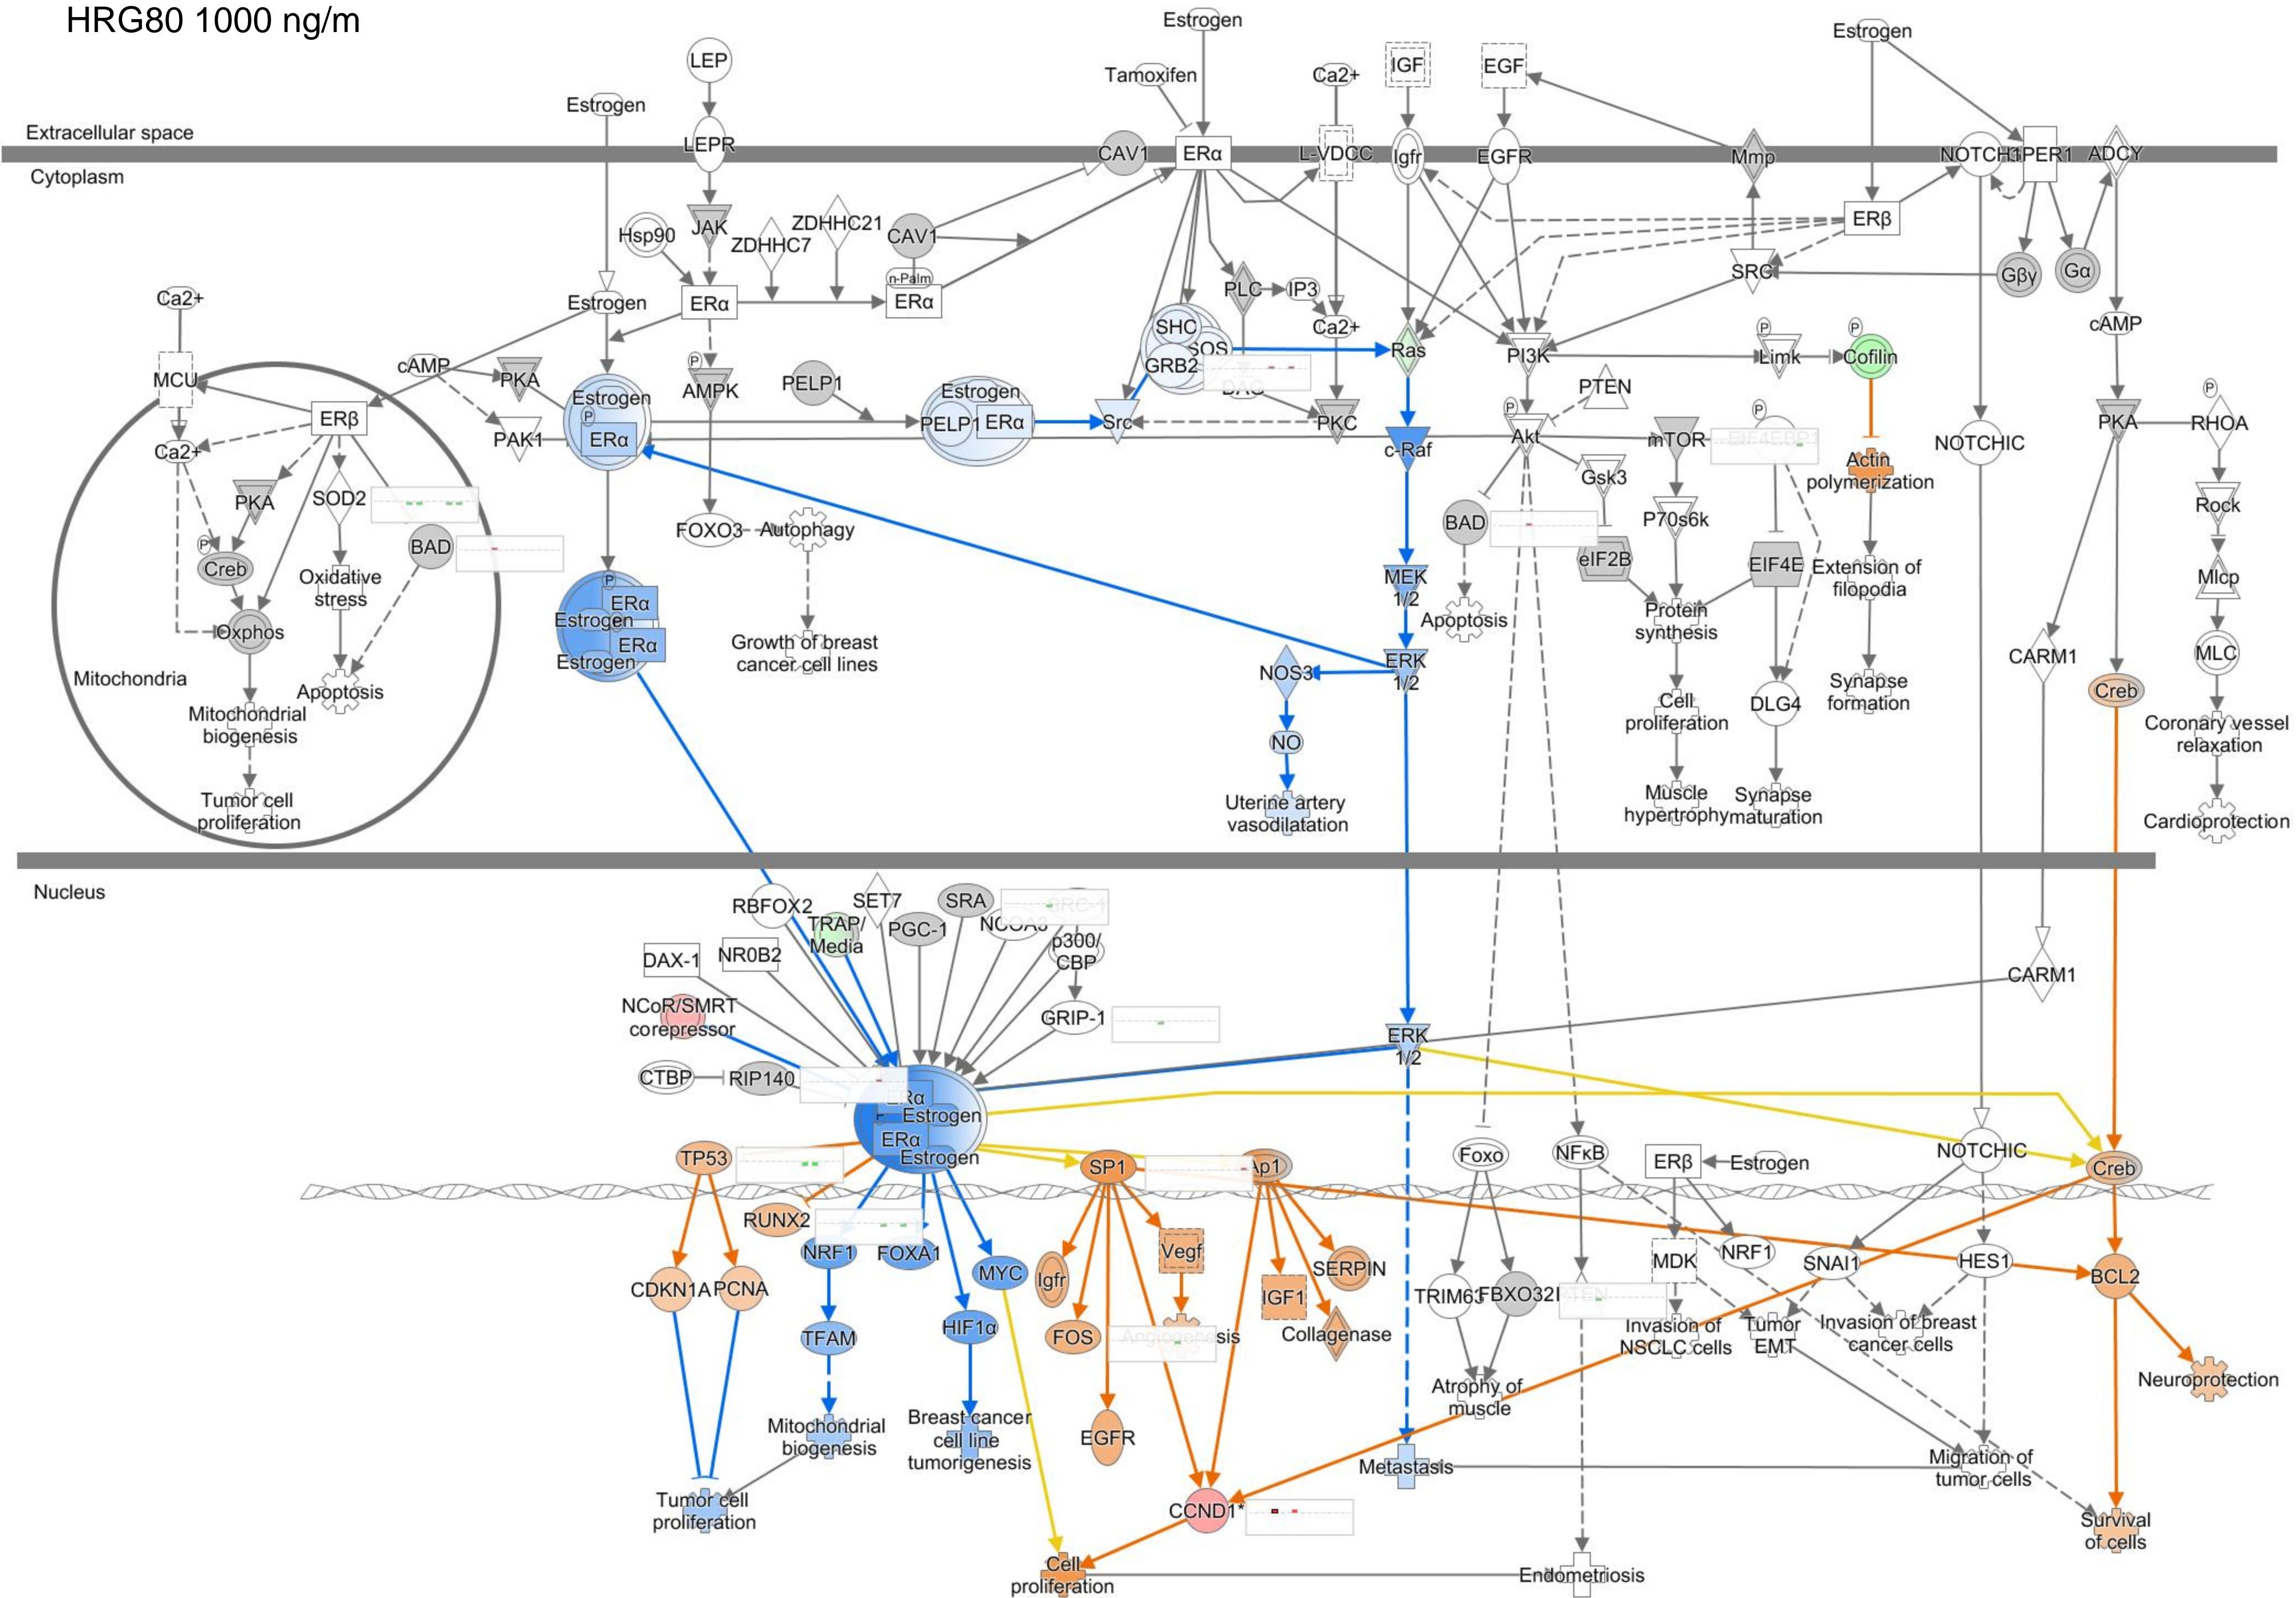

In the absence of ligand, EGF and IGF regulate ER mediated gene transcription

HRG80 10000 ng/ml

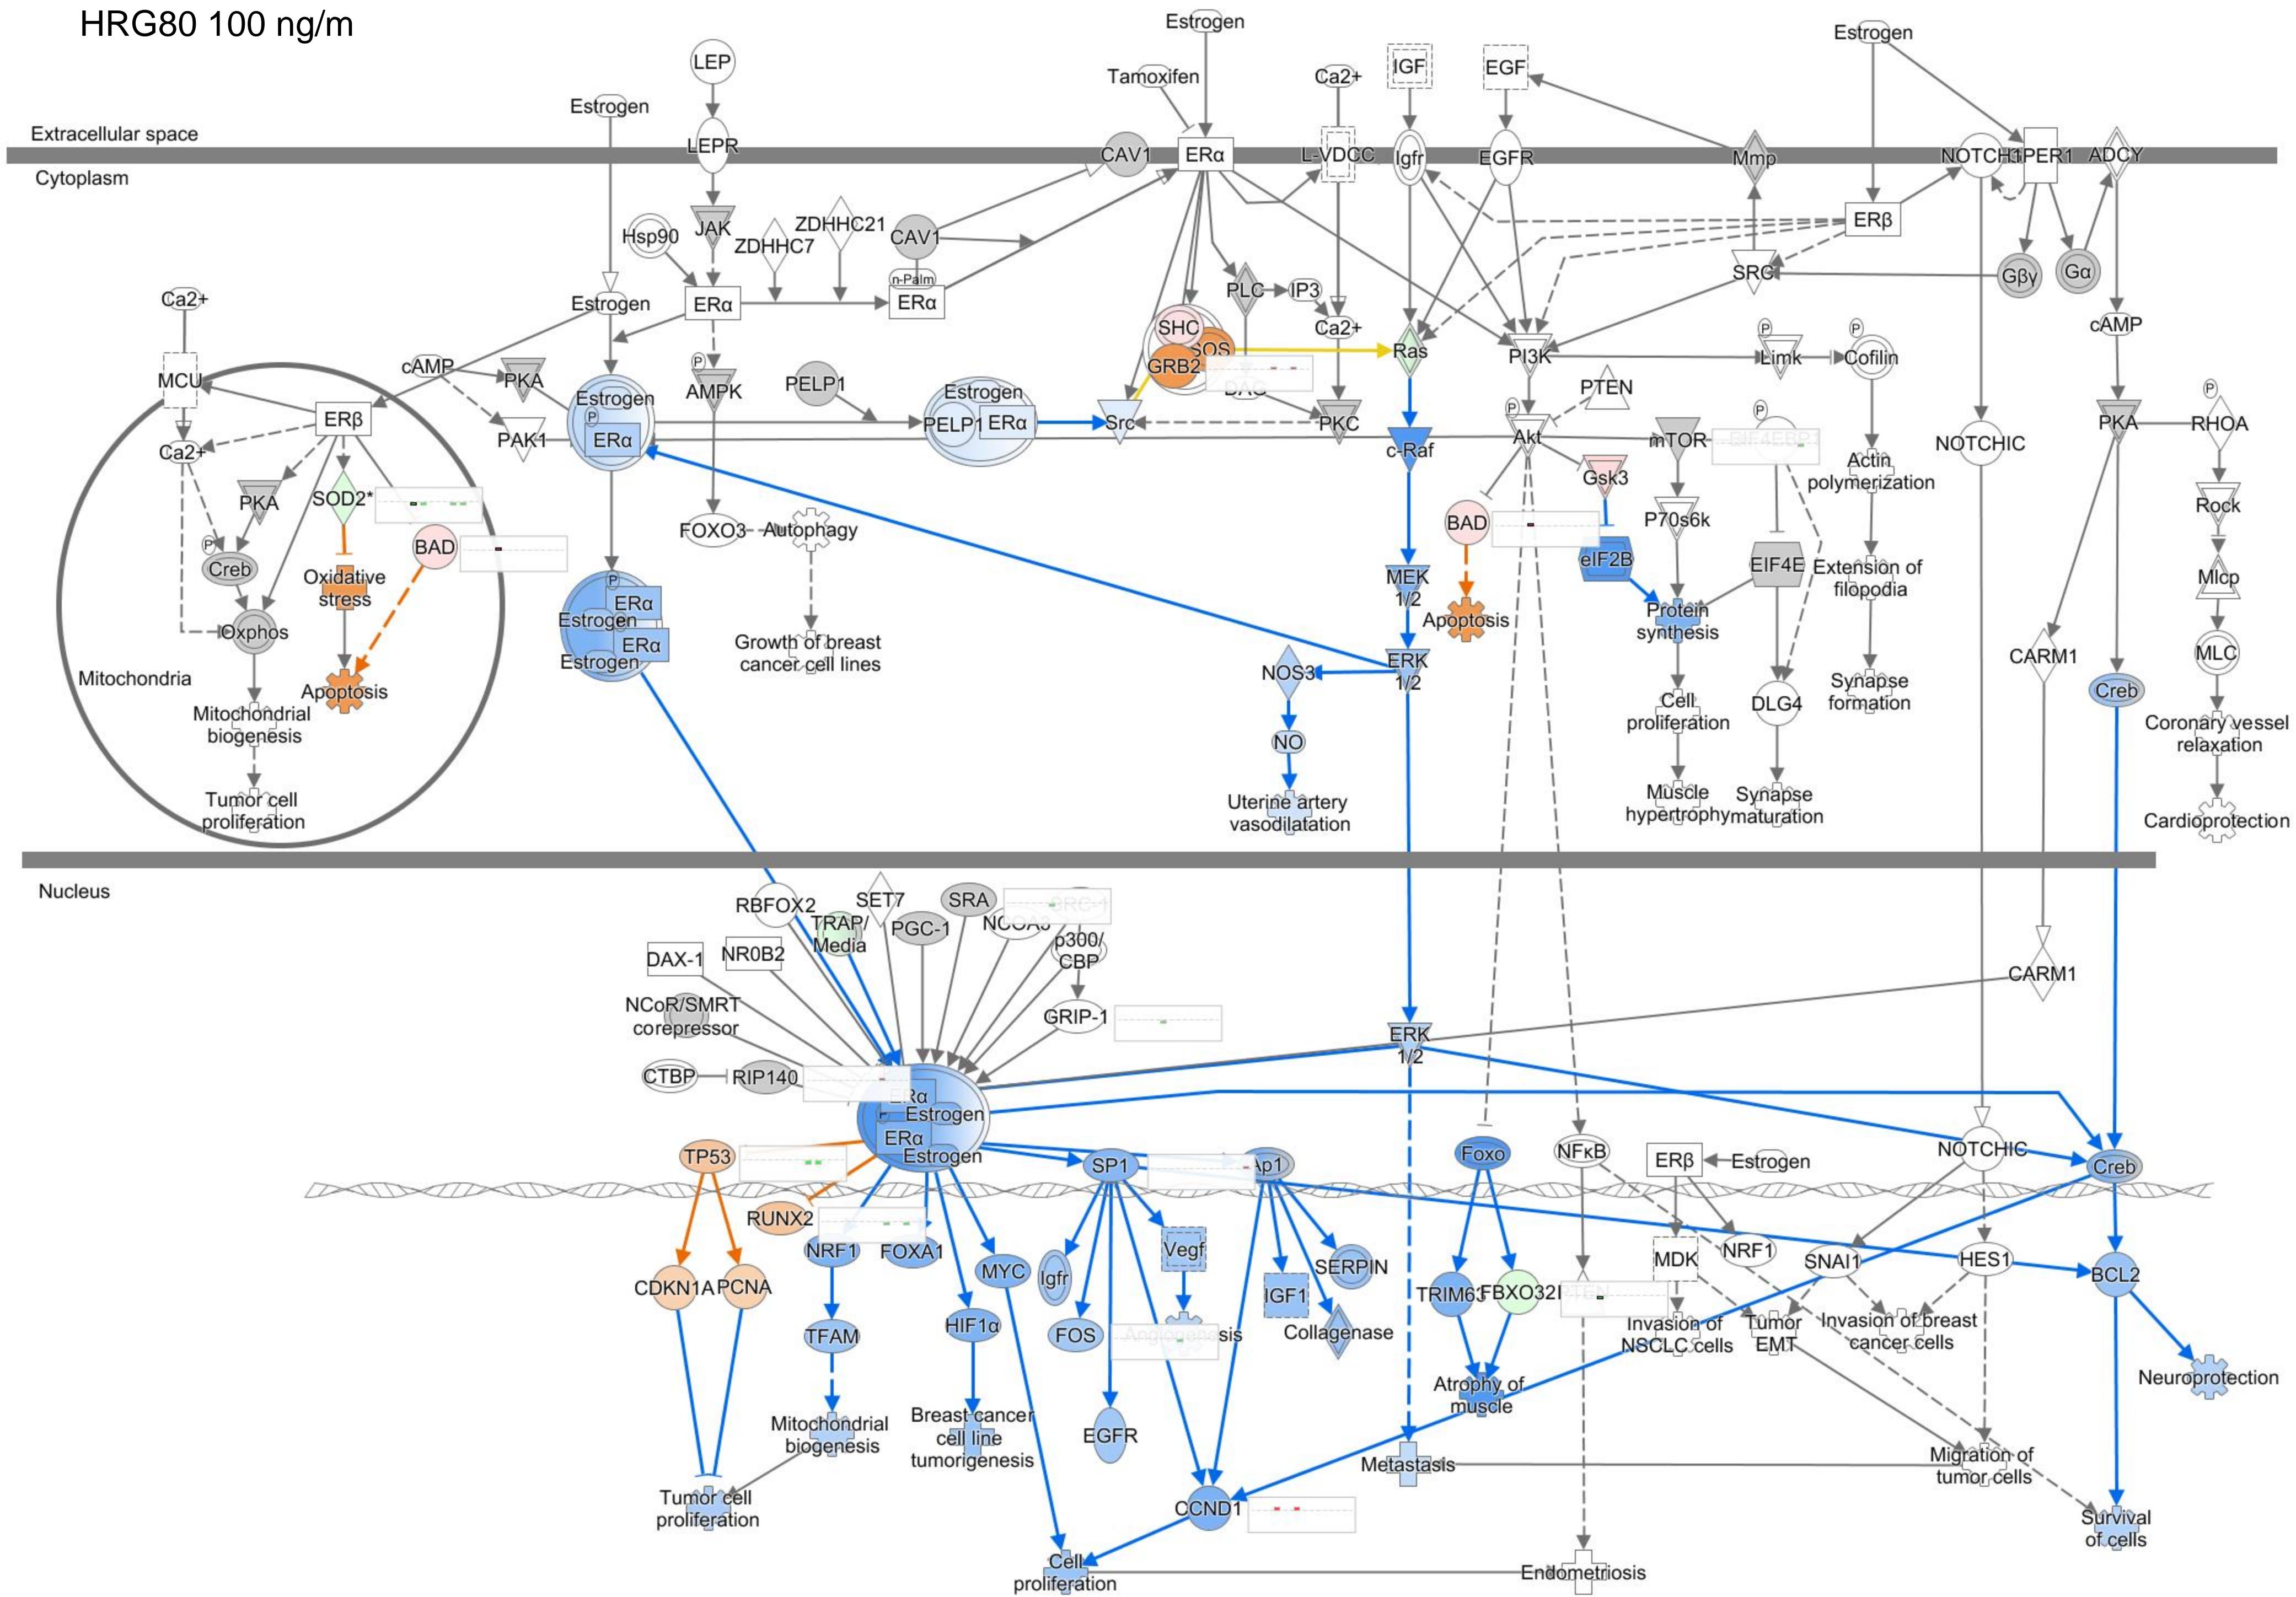

HRG80 1000 ng/m

In the absence of ligand, EGF and IGF regulate ER mediated gene transcription

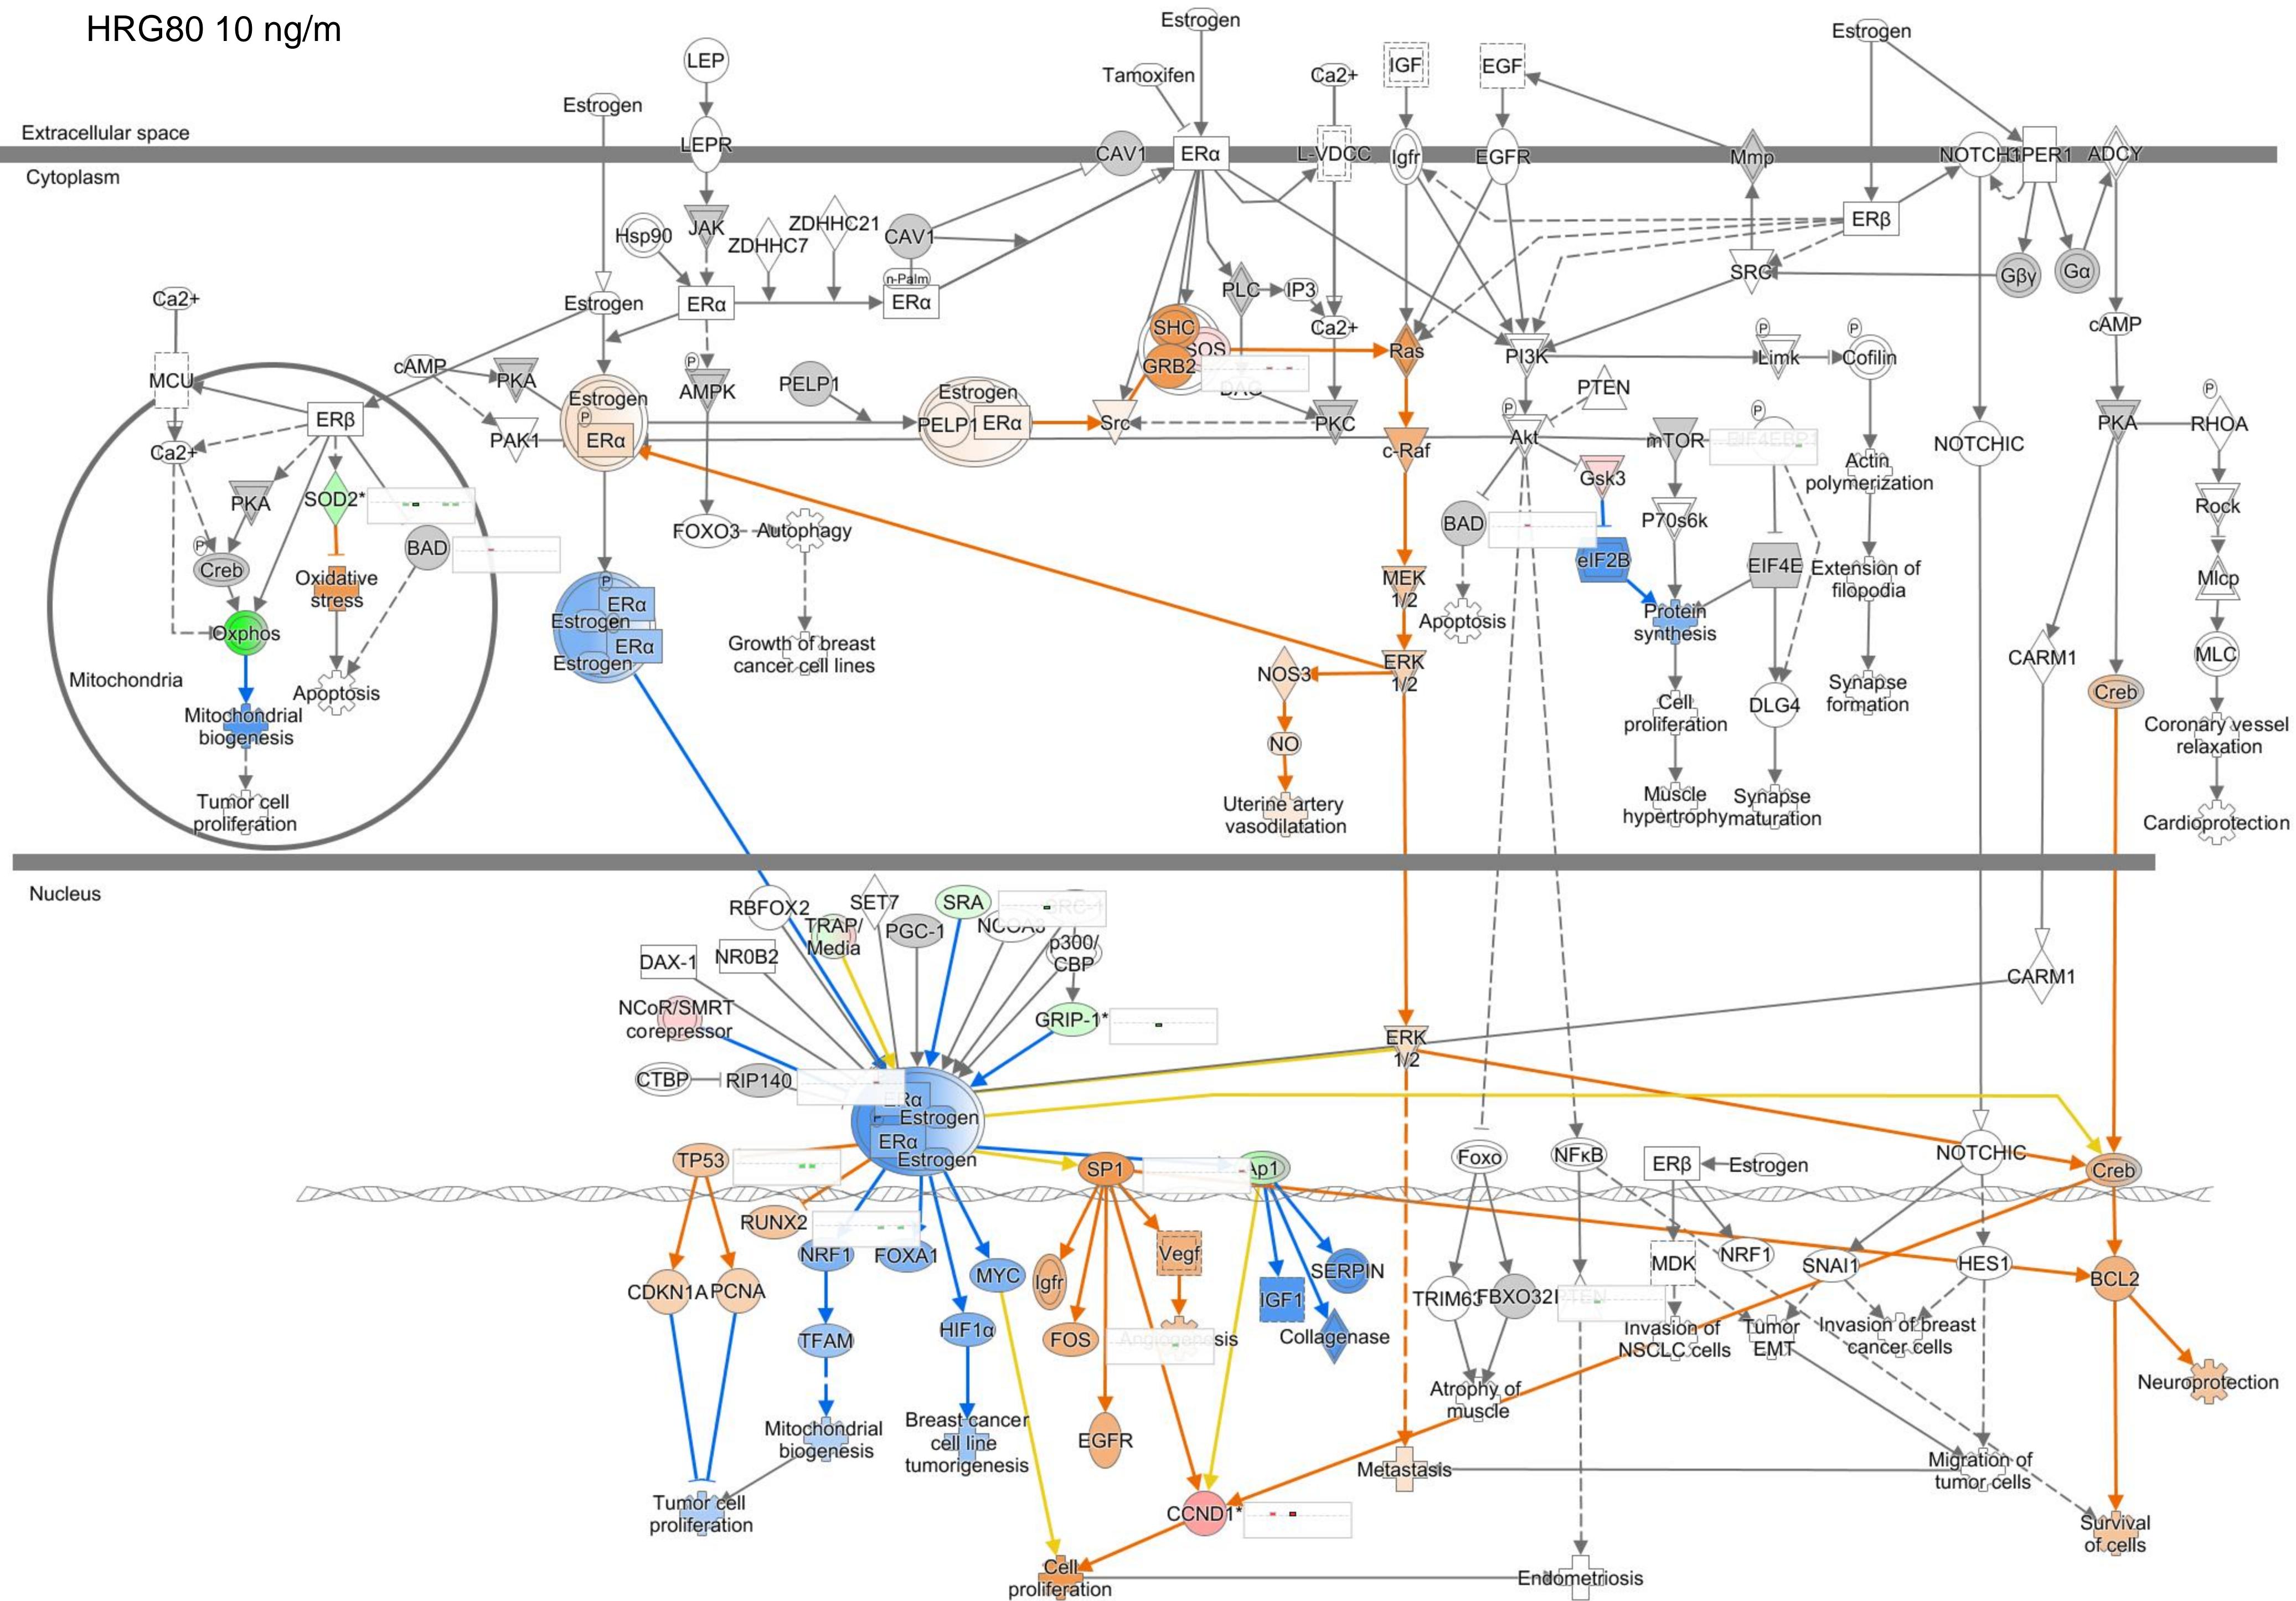

# HRG80 100 ng/m

In the absence of ligand, EGF and IGF regulate ER mediated gene transcription

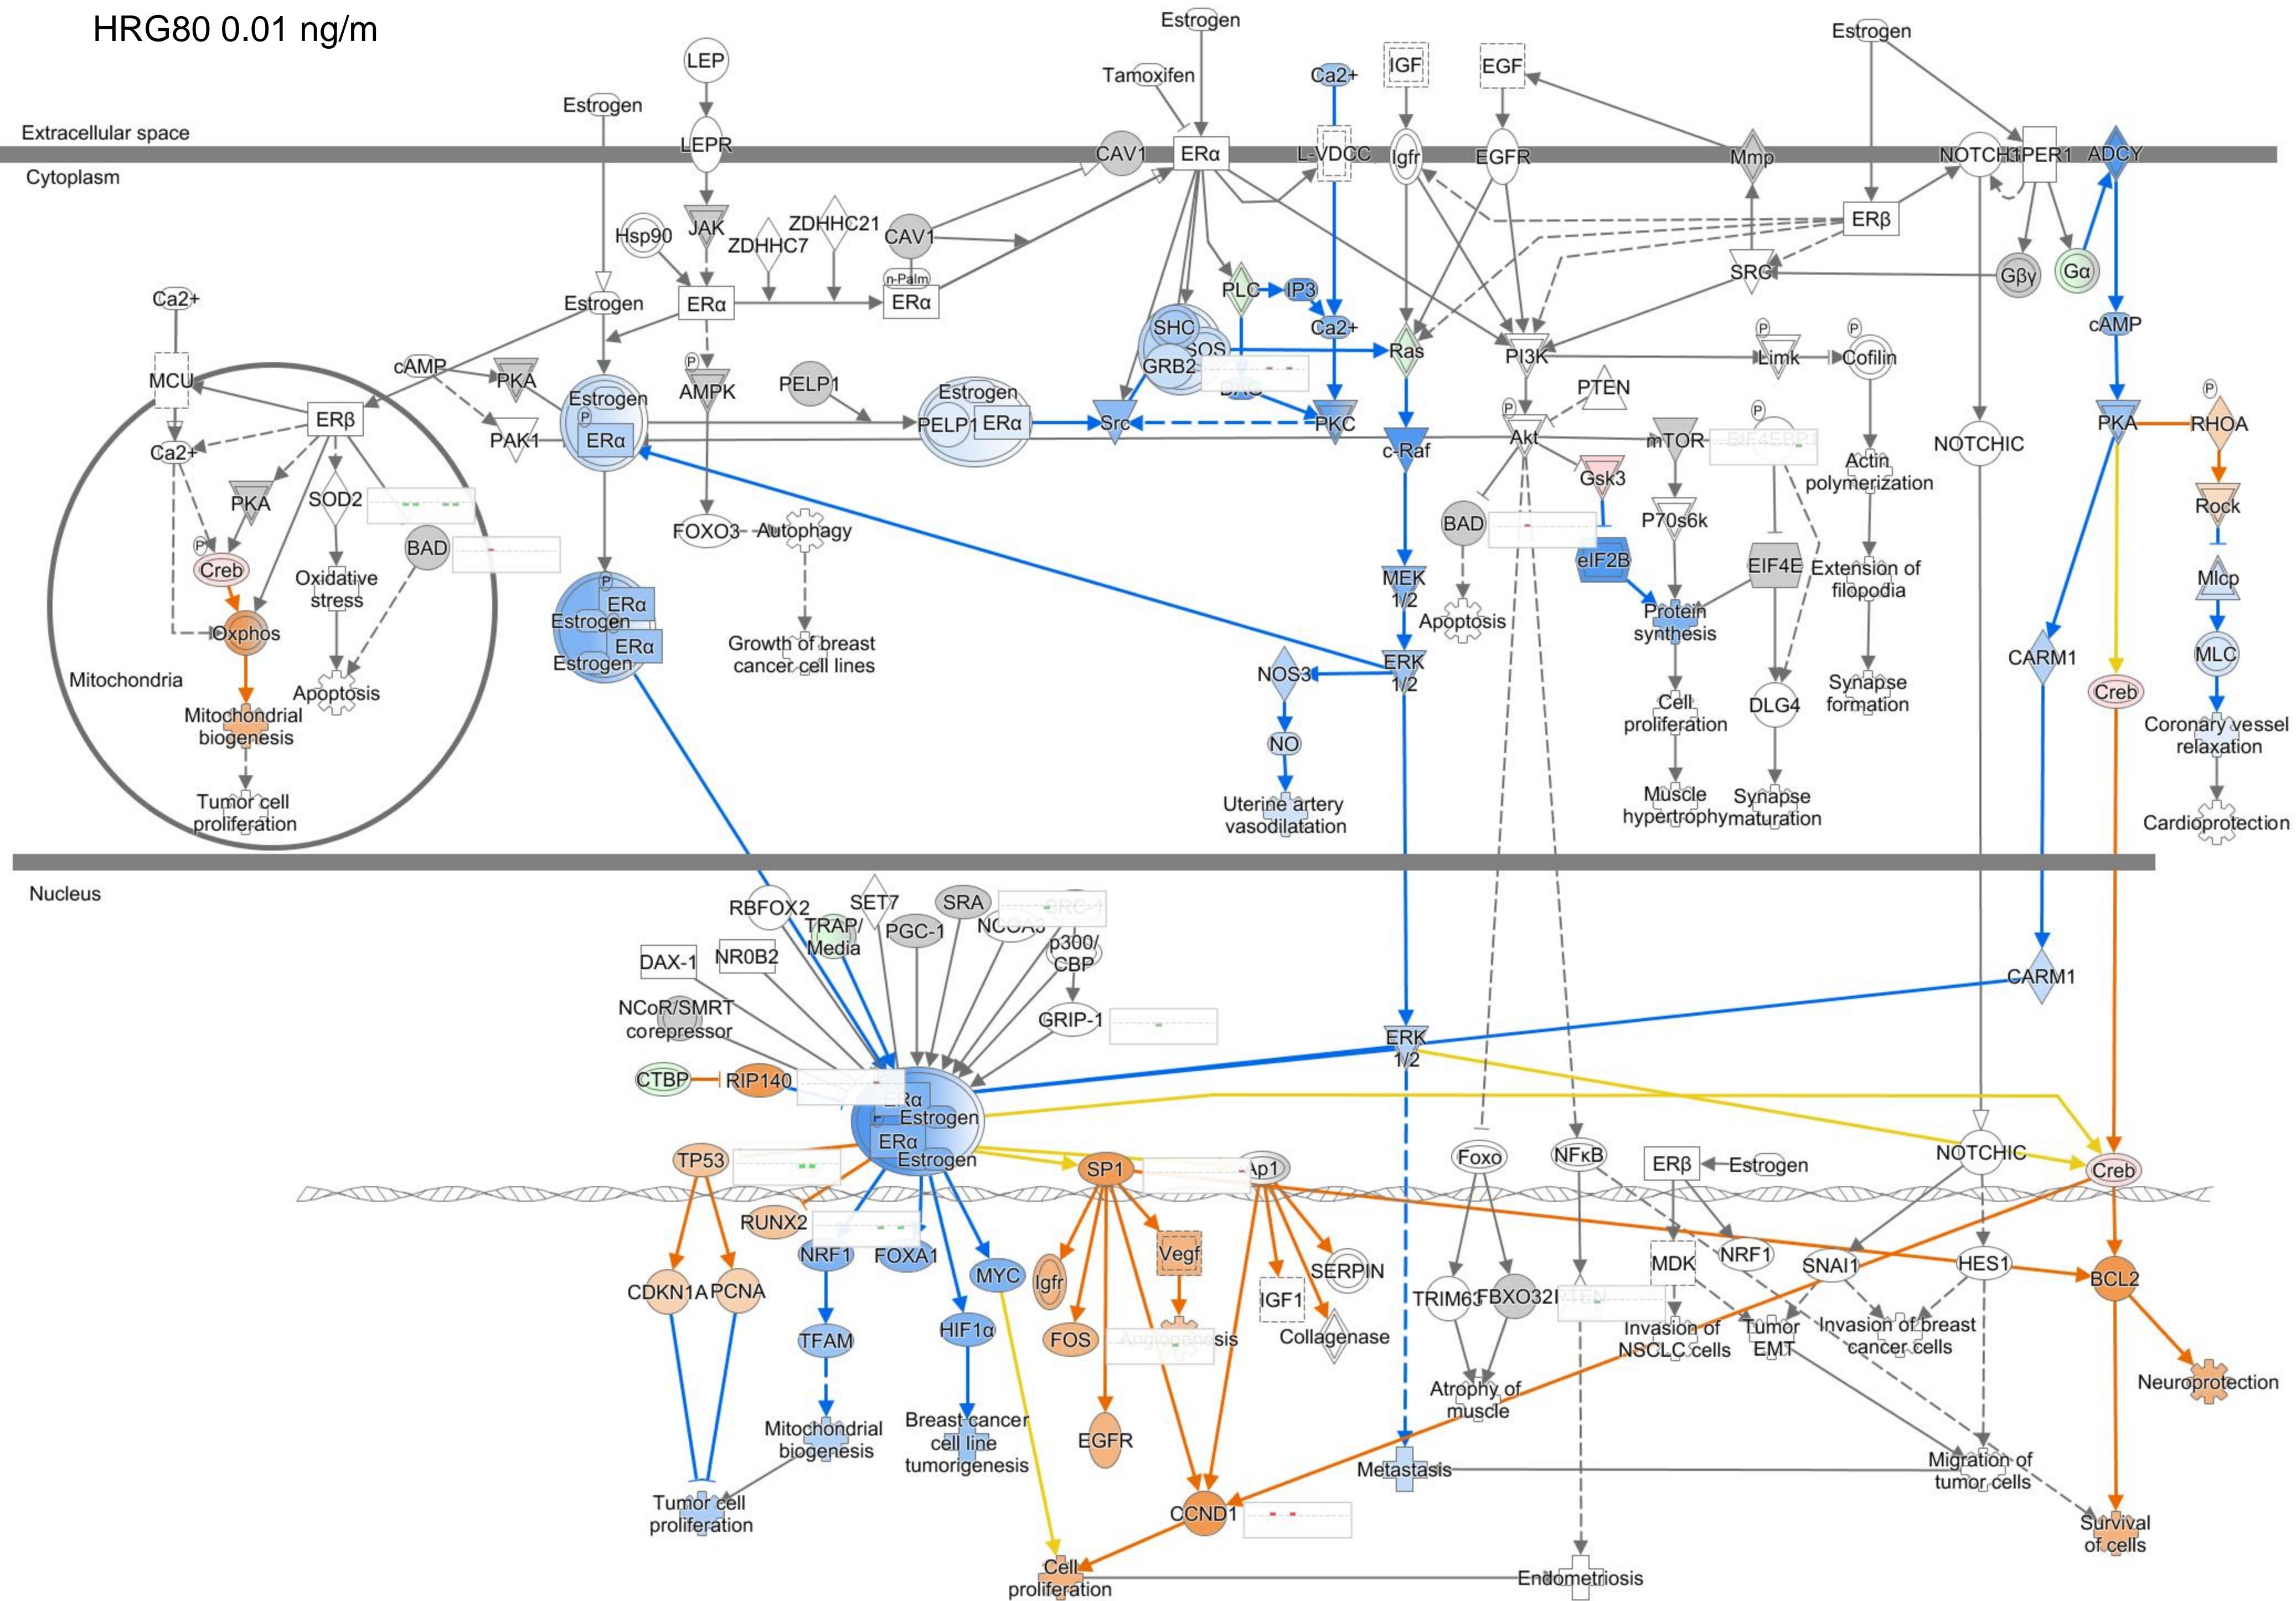

In the absence of ligand, EGF and IGF regulate ER mediated gene transcription

HRG80 10 ng/m

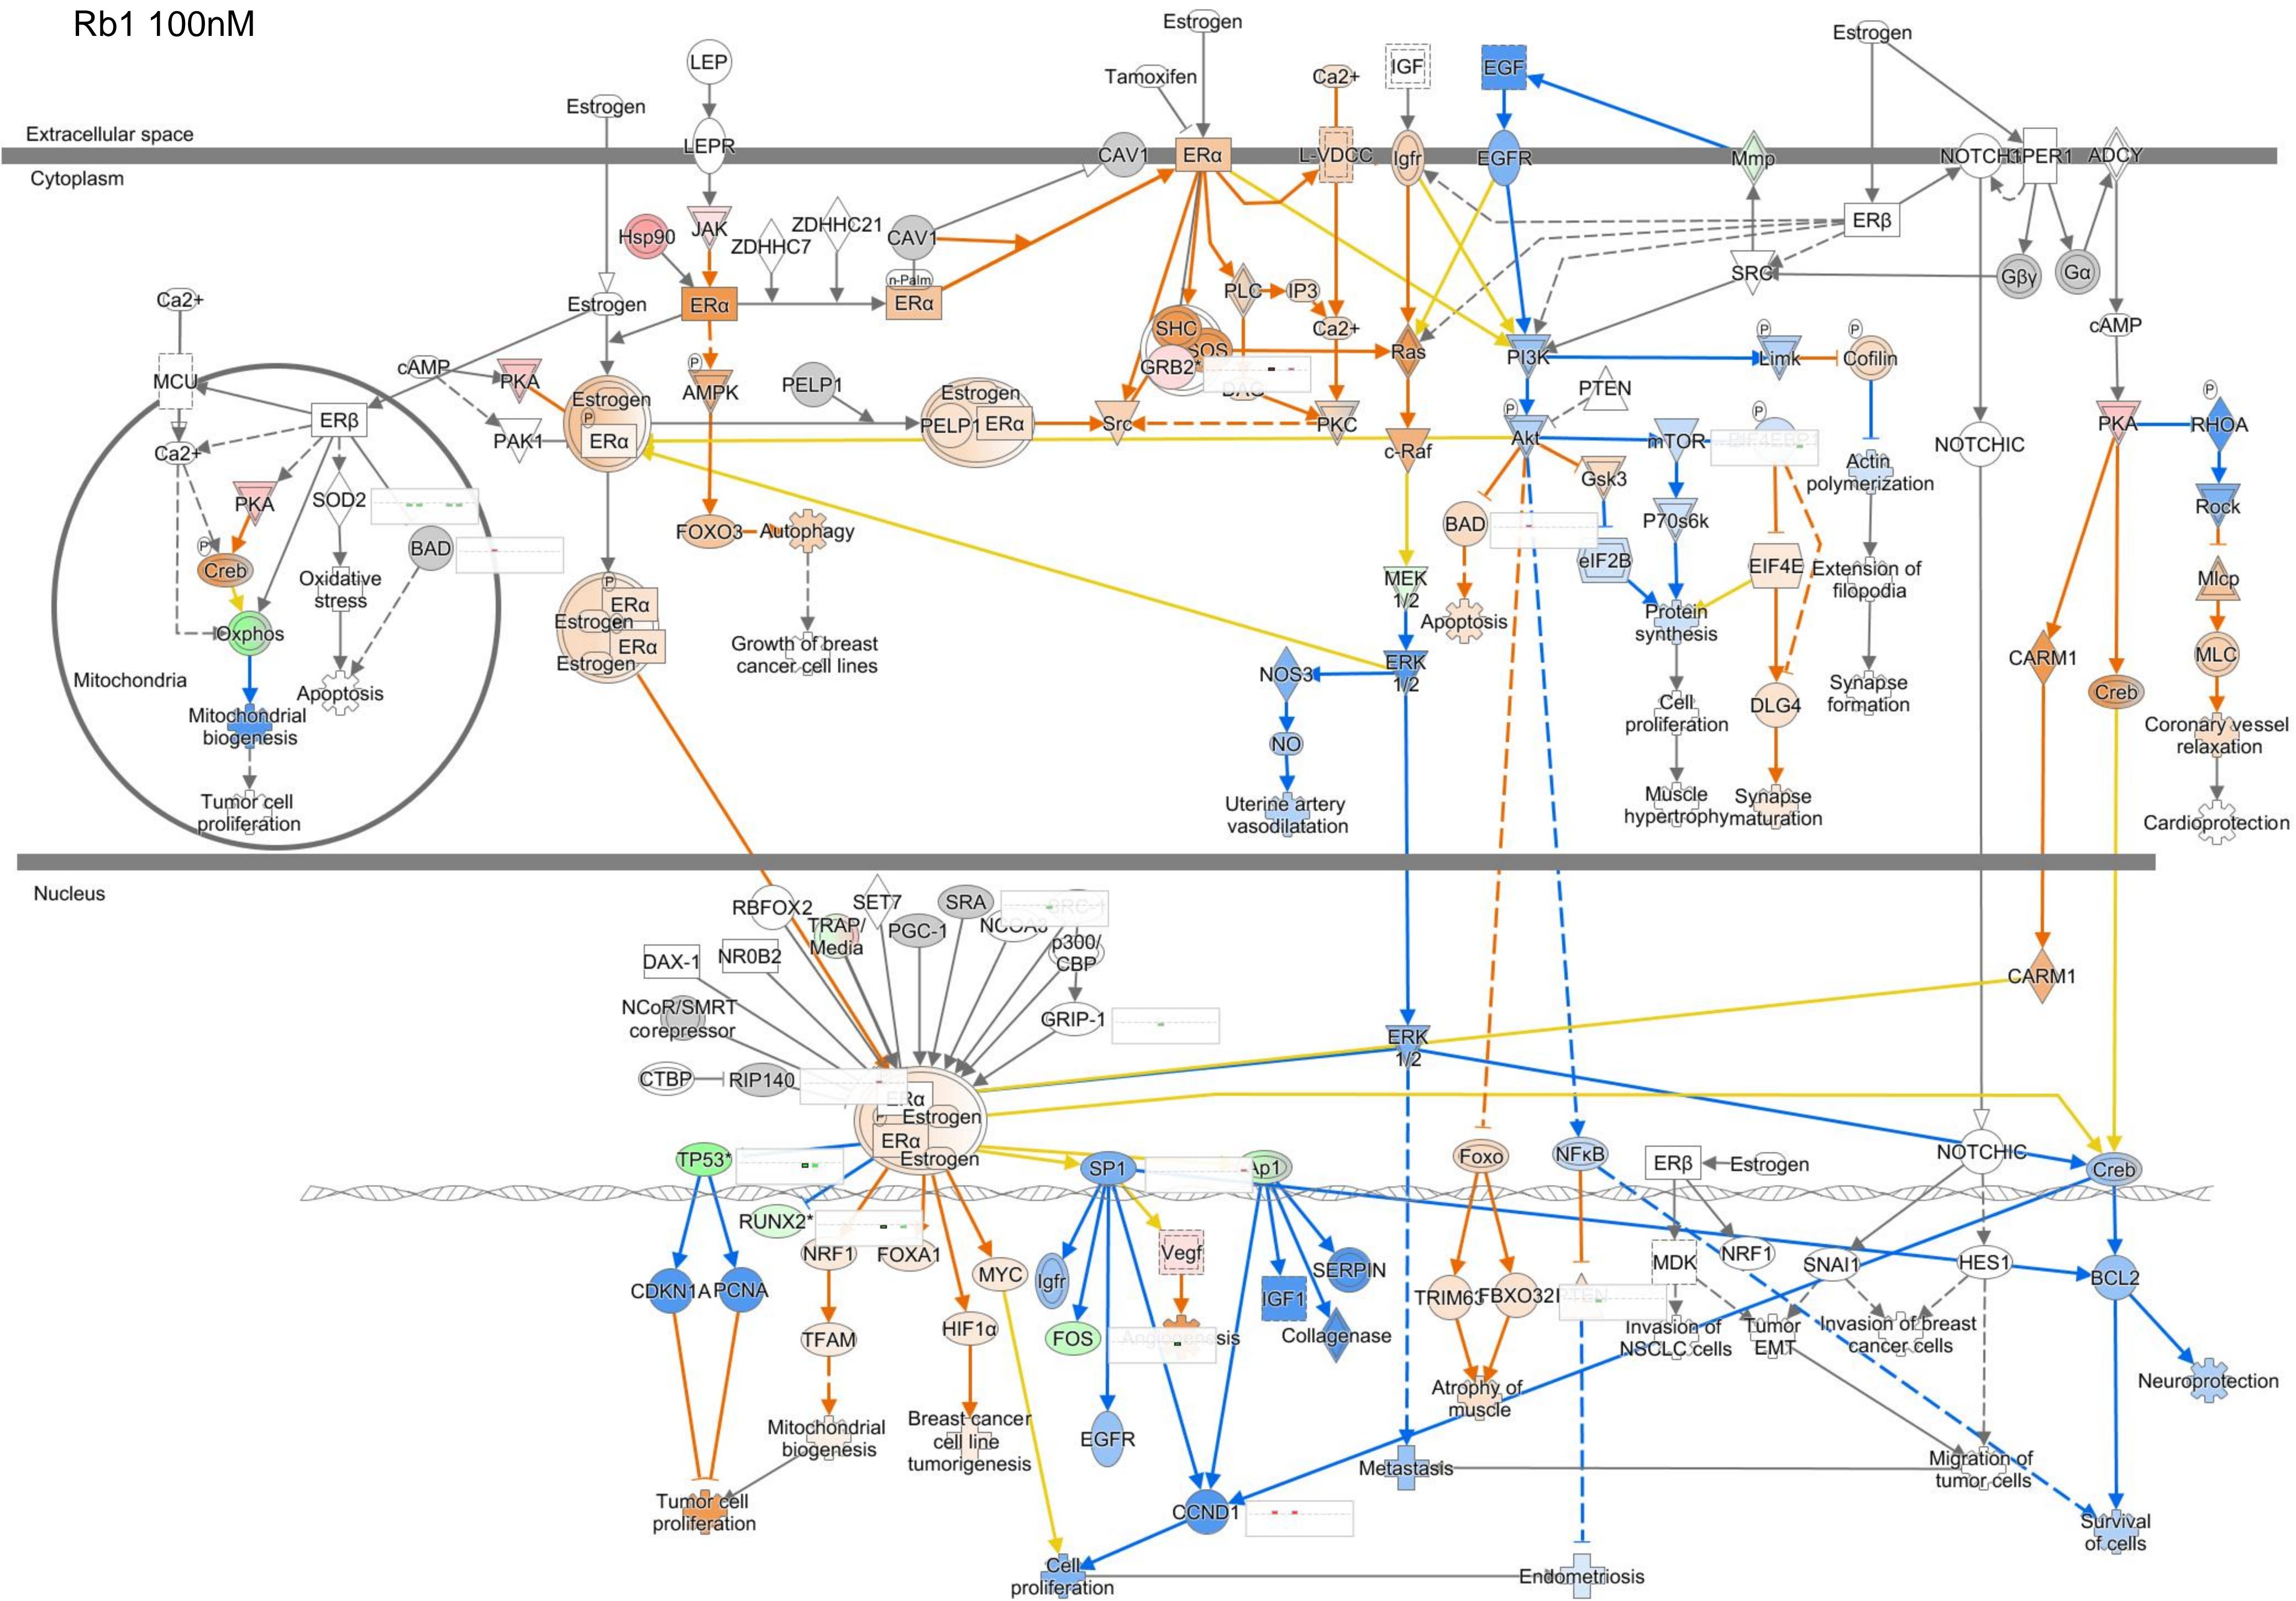

In the absence of ligand, EGF and IGF regulate ER mediated gene transcription

HRG80 0.01 ng/m

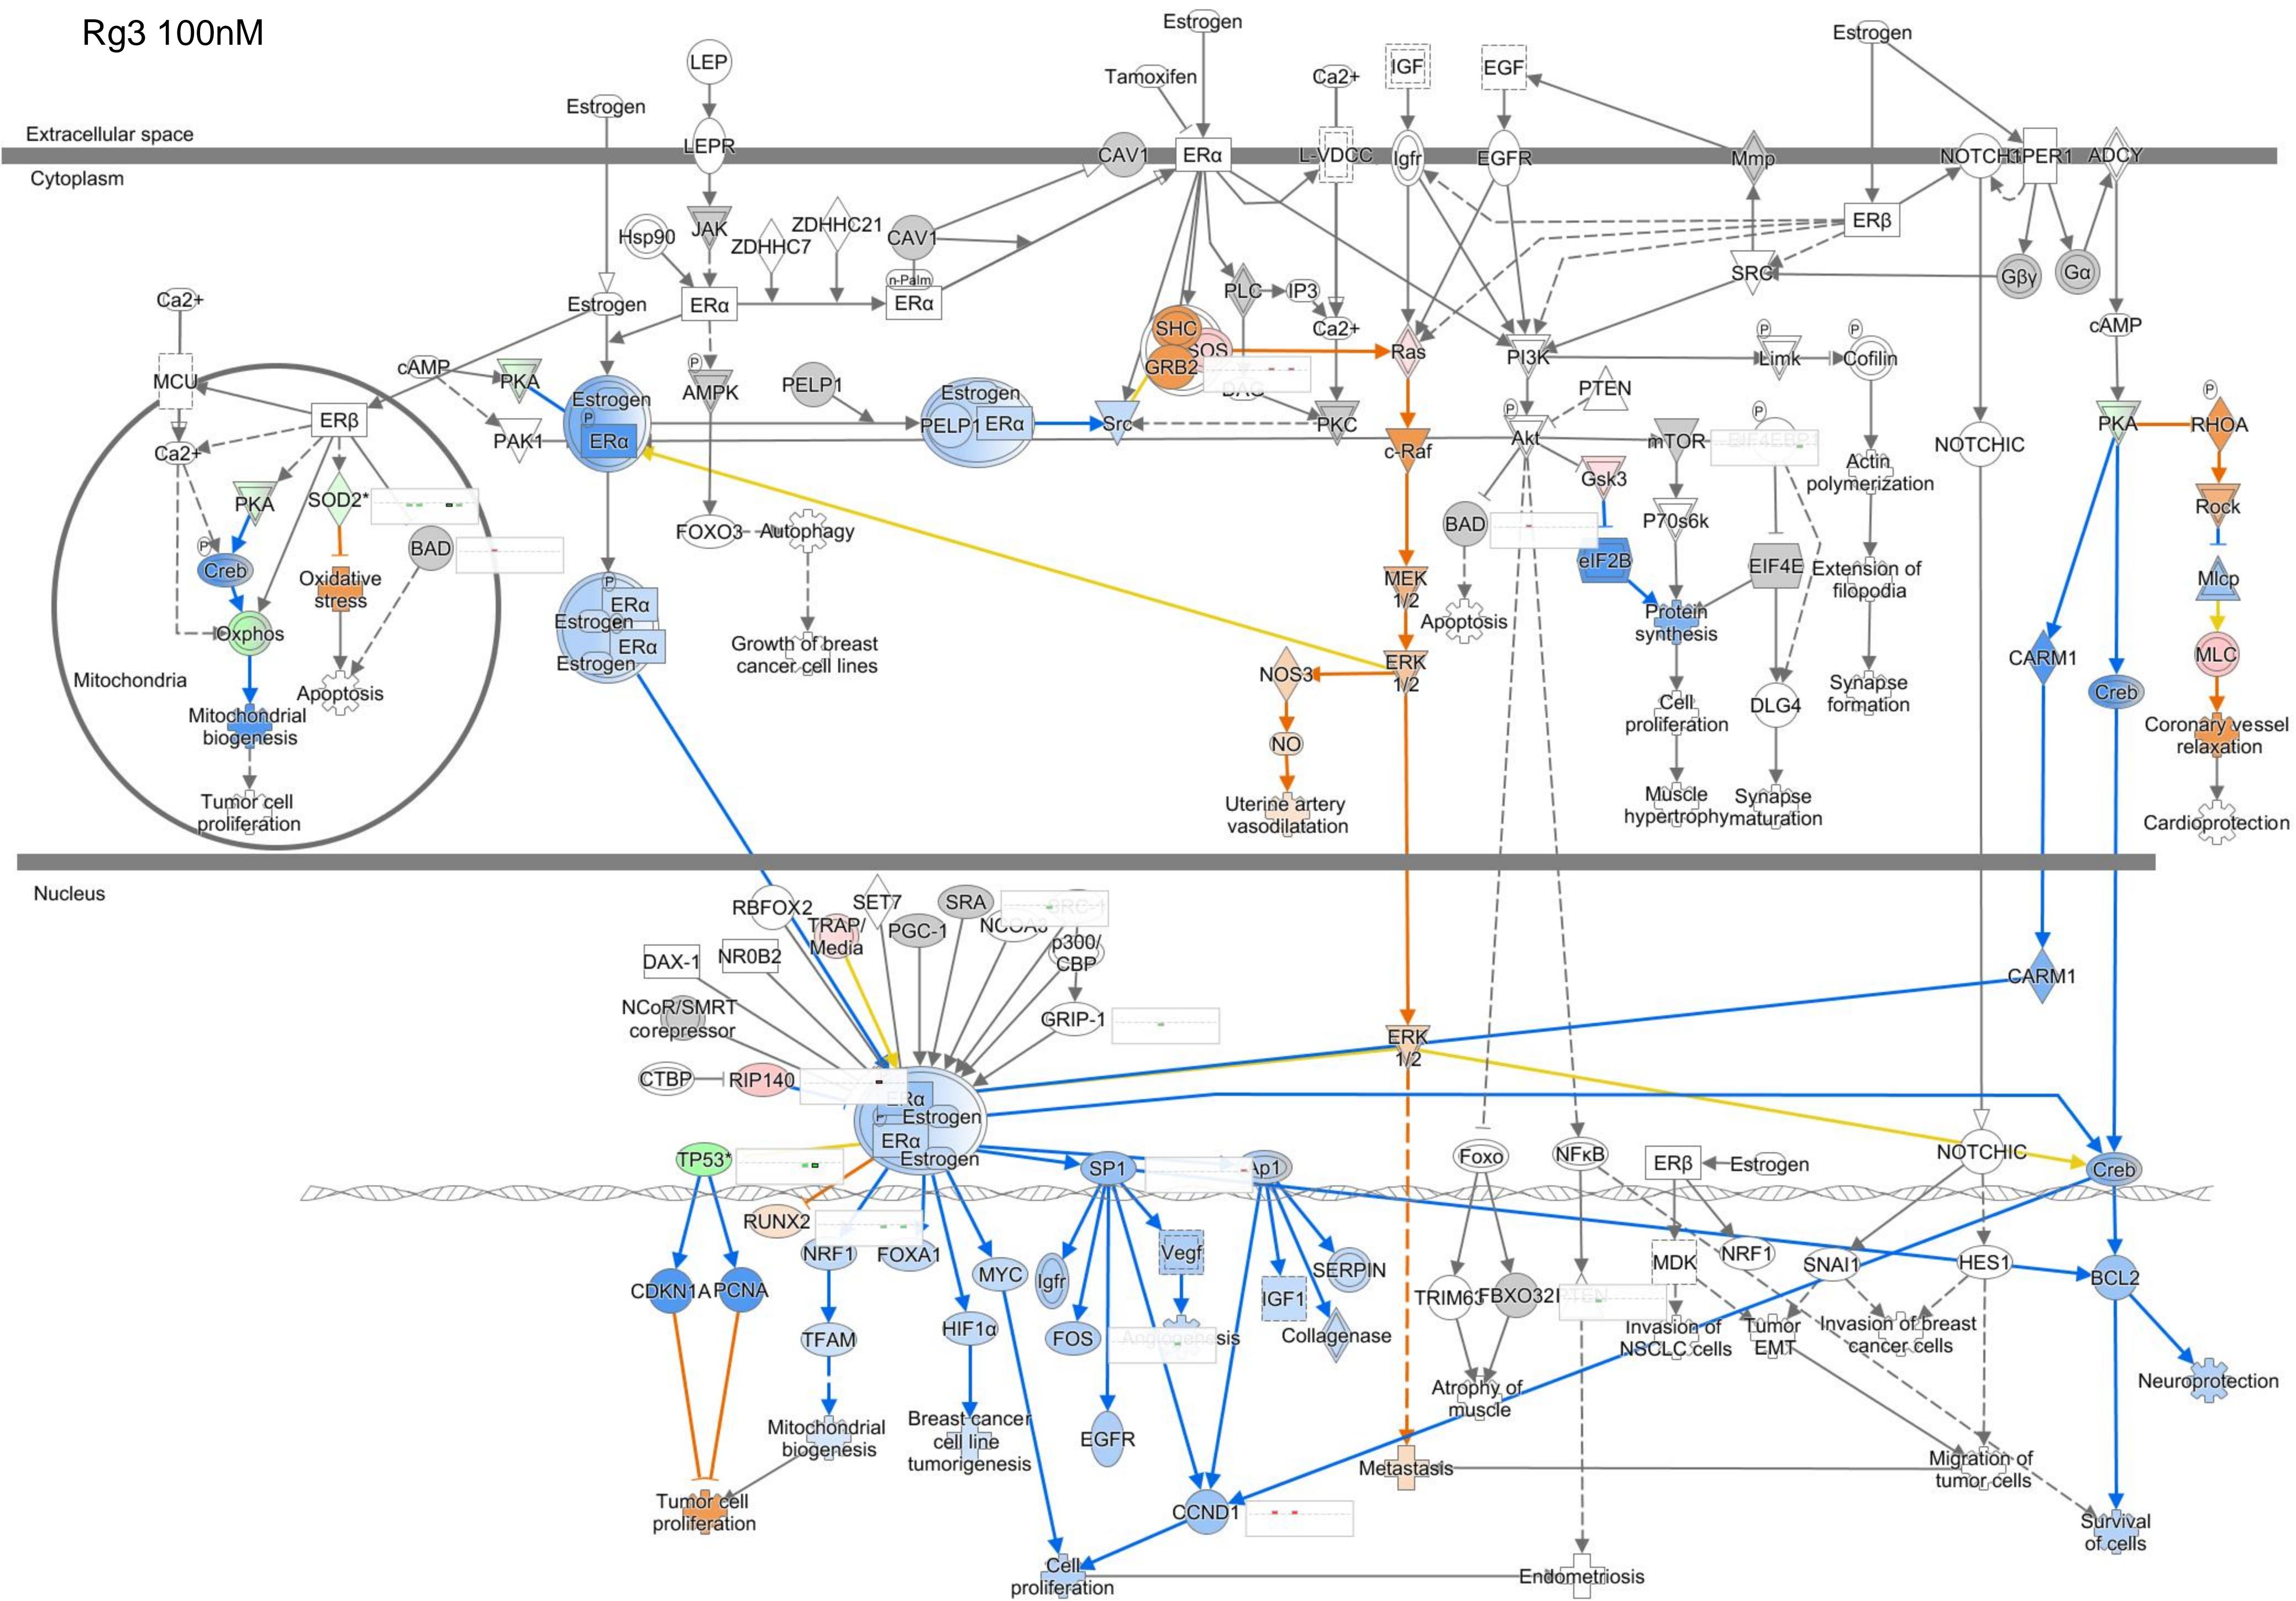

In the absence of ligand, EGF and IGF regulate ER mediated gene transcription

Rb1 100nM

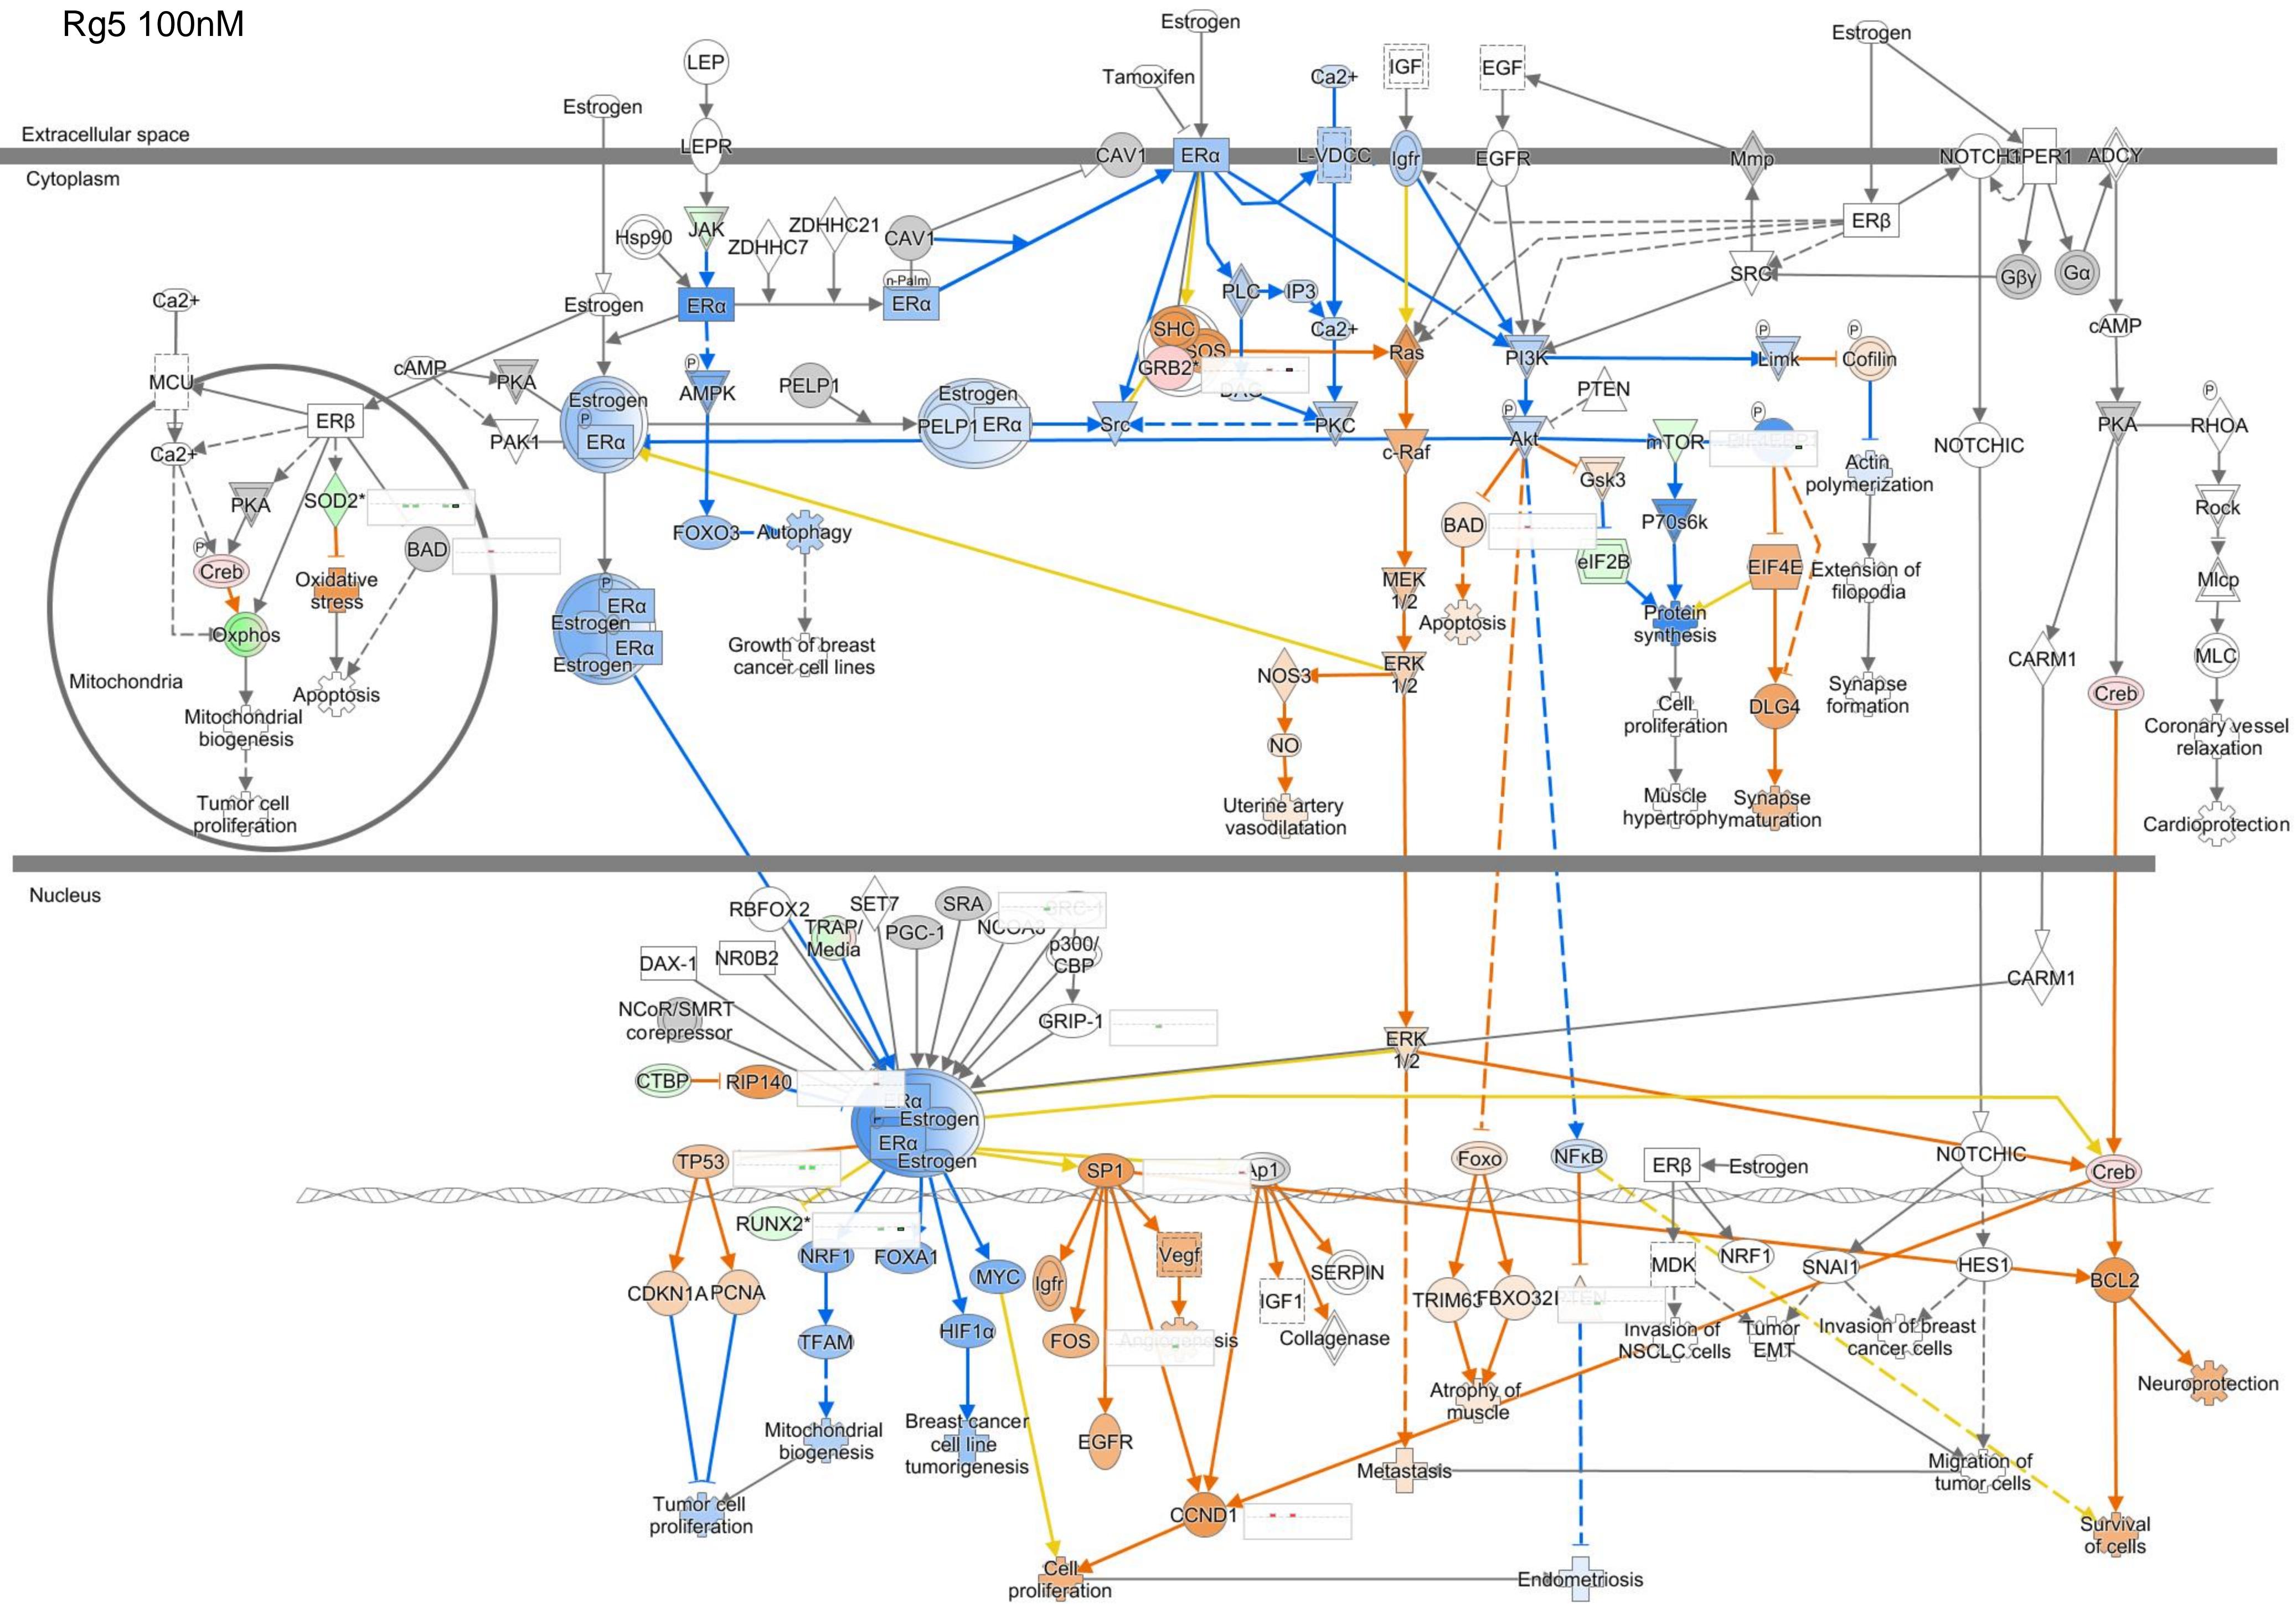

Rg3 100nM

In the absence of ligand, EGF and IGF regulate ER mediated gene transcription

In the absence of ligand, EGF and IGF regulate ER mediated gene transcription

Rg5 100nM

In the absence of ligand, EGF and IGF regulate ER mediated gene transcription

Rk1 100nM
