

Supplementary Table 4: Number of MDR and CP-Kpn isolates. Tables gives summary of the number of MDR and CP-Kpn selected CS and CHR isolates. For CS, MDR and CP-Kpn classification was not possible for four and three isolates respectively of which one isolate was also CHR following C2. For CHR, C1+C2 represents the total amount of isolates fulfilling C2 whilst C2 alone represents isolates only fulfilling C2.

	Total	MDR		CP-Kpn	
		+	-	+	-
CS (selected)	288	244	40	80	205
CHR C1	25	19	6	9	16
CHR C2	83	72	10	23	59
