Dear Preprints.org Editorial Office,

I would like to submit the manuscript entitled “Examination the abc conjecture using some functions.” by “Seiji Fujino” to be considered for publication as “an original article” in the Preprints.org.

As well known, the weak abc conjecture is believed to be correct.
However, some people do not seem to believe the proof of the weak abc conjecture.
Moreover, the strong abc conjecture has not yet proven.

We would submit the article that try to derive the negative consequence of the weak abc conjecture.
Namely, we derive that the weak abc conjecture is not true.
Additionally, we show that the strong abc conjecture is not true.

However, we have been studying this article for years.
Therefore, I decided to post it your Preprints because I thought that everyone should review and evaluate this article.

We believe these findings will be of interest to the readers of your Preprints.
We declare that this manuscript is original, has not been published before and is not currently being considered for publication elsewhere.

We know of no conflicts of interest associated with this publication, and there has been no significant financial support for this work that could have influenced its outcome.
As the corresponding author, I would like the manuscript to be peer-reviewed and approved your publication.

We have been studying this article for years.
Therefore, I decided to post it here because I thought that everyone should review and evaluate this article.
We hope that our dissertation will be online on your Preprints.
And, we hope you find our manuscript suitable for publication and look forward to hearing from you in due course.

Yours Sincerely,

Seiji Fujino

RHC Institute.
